Electricity still adds up to...
Today's Biggest Bargain!

If your purchases of electricity were rung up on a cash register like your grocery purchases, the list would be much, much longer today than it was in 1939. But Edison domestic rates are actually lower now than they were then. You use much more electricity today, but the total cost is still just about the smallest item in your household budget—which clearly marks electricity as today's biggest bargain.
